

An easy and powerful way to lower your maritime emissions and scale up clean energy solutions.

ZEMBA is a first of its kind buyers group that enables companies to join forces to accelerate sustainable, scalable, and economically viable maritime solutions. We create new competitive markets and achieve immediate economies of scale.

Shipping lines are struggling to finance the scale up of sustainable fuels and bring them to market. On behalf of our members, ZEMBA runs competitive tenders aimed at kickstarting the maritime sector's clean energy economy of the future. ZEMBA provides essential tools to prepare our members to be a leader while navigating this transition. As a ZEMBA member, you will receive:

A **proven, easy, and affordable** pathway to reduce emissions and achieve your goals

Clarity and credibility on carbon accounting, costs, clean fuels, and tendering

A **safeguard** against long term price volatility

A **flexible approach** that doesn't complicate logistics or contracting

A **first mover advantage** in this growing market of sustainable fuels and technologies

Together, ZEMBA members are shaping the maritime sector of the future, demonstrating leadership, and reducing their supply chain emissions. The best part is that **ZEMBA does all the hard work for you!**
